

01 March 2021

Pacifica BAF/EBAF update – April 2021

Please be advised that following a review of the current bunker prices, our Bunker Adjustment Factor effective 01 April 2021 will be set at + 24.84% . This review includes an EBAF (Emergency BAF) of 4.14% to recover cost of increased monthly fuel consumption.

As has been well publicised ; the ongoing productivity levels and congestion through container ports are causing significant delays and disruption to the N.Z supply chain .

MV Moana Chief has been operating at above service speed and consuming increased fuel to maintain schedule and deliver a fixed-day weekly frequency.

Pacifica remain committed to providing New Zealand's most sustainable inter island transport solution and will return to normal service speed at earliest opportunity , at which time the EBAF allowance will be removed . BAF will be reviewed again at the end of March to apply from 01 May 2021.

If you require more information on BAF, please contact your local Pacifica Shipping Account Manager.

Kind Regards,

Pacifica Shipping
